§ 01 · ABSTRACT KITTENS

What it is.

Abstract Kittens is an NFT project built on a simple story: a young man worked through hard times by drawing abstract kittens, and the kittens turned into a world of their own.

The story is about the ups and downs of life — and how **simplicity often quietly brings happiness** with it.

§ 02 · CONCEPT

The thought experiment.

The project is inspired by a thought experiment from **1935**. The premise was simple, and a little cruel: until the box is opened, the cat inside is both alive and not — both states held in superposition.

We took the box and removed the cruelty. What's left is a quiet promise: **you only see what's inside if you take a look.** Each NFT begins as a **schröder's box** — a closed mystery that reveals its true form over time.

§ 04 · RARITY

INSIDE EACH KITTEN.

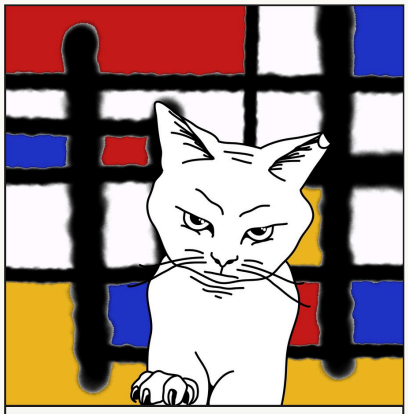

Every kitten comes in three rarity tiers: common, uncommon, and rare. The same structure is used across all four kittens. Common kittens sit on a single monochrome color, uncommon kittens on an abstract painting, rare kittens on lime — dressed in one of fifteen themes.

§ 05 · RARE THEMES

Fifteen ways to be rare.

668 rare kittens, spread across fifteen themes of 44–46 kittens each. Twelve of them below.

§ 06 · VISION

Our vision is to turn simple kitten drawings into meaningful pieces of art that people enjoy collecting, sharing, and connecting with.
