§ 01 · ABSTRACT KITTENS

What it is.

Abstract Kittens is an NFT project built on a simple story: a young man worked through hard times by drawing abstract kittens, and the kittens turned into a world of their own.

The story is about the ups and downs of life — and how simplicity often quietly brings happiness with it.

§ 02 · CONCEPT

The thought experiment.

The project is inspired by a thought experiment from **1935**. The premise was simple, and a little cruel: until the box is opened, the cat inside is both alive and not — both states held in superposition.

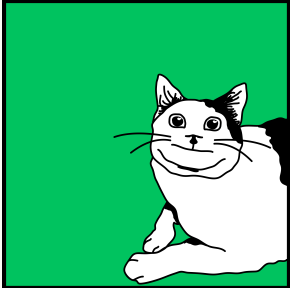

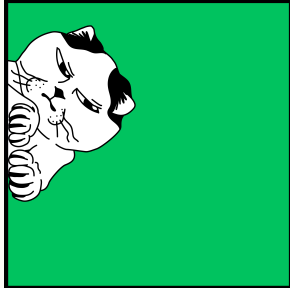

We took the box and removed the cruelty. What's left is a quiet promise: **you only see what's inside if you take a look**. Each NFT begins as a **Schröder's Box** — a closed mystery that reveals its true form over time.
